

bright future – shining stars

If you hadn't gone into science and ICT, what areas would you have gone into? Art?

Jenny Martin

Yes, I would have gone into art, I think. I did Art until Year 11. It's still a passion of mine as well as science and you'll find that many scientists have a creative outlet, whether it's some sort of painting or I don't know, modelling or pottery, you'll find that there's a link between science and art. I've actually set up a science art website called Angstrom Art (<http://www.imb.uq.edu.au/index.html?id=18056>), where you can go and look at images from real scientists that also have an appreciation of art, so I would definitely have gone into art, probably not with very much pay though.

Melissa Griffith

I think a really dream job for me would be the music industry somewhere, but I'm also very much interested in community work so maybe I would have been a teacher or social work or something like that perhaps, if I hadn't have gone into engineering.

Miranda Forwood

If I was good enough, I would have loved to be a dancer. I did dance through 'til Year 12, but yeah, I wasn't that good at it, but I've just taken it back up again, but yeah, I wouldn't do it professionally but yeah, dancer.
